

How to Fit a Halti

Clip directly behind the ears in the **nape** vs. low on the back of the neck. You should be able to fit two fingers under the strap and no more.

Attach the **backup safety clip** to the collar. A martingale collar is preferred when dealing with escape artists.

To check the size, attach the leash to the halti and give it a little consistent tug. This will tighten the halti around your dogs snout, mimicking how it would work if they pull. If the two plastic **D rings** (just under the chin) touch, the halti is too small. There should be a half to 1 inch gap when the dog pulls.
